PATTERNED CARPET

beautiful carpet begins with us

Without Stainless treatment

With Stainless treatment

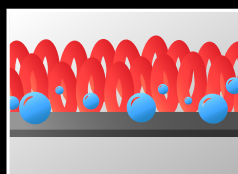

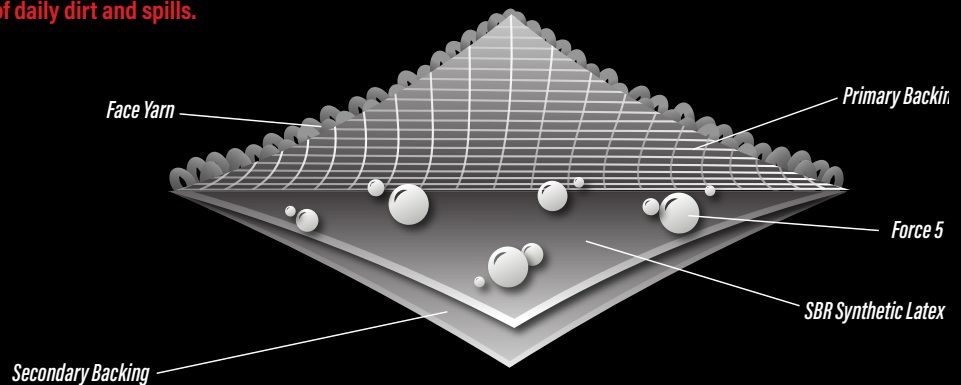

StA⁺ainless

- Stainless encapsulates the entire fiber providing a permanent barrier that cannot wear off or be cleaned off over time, unlike topical stain protectants.
- Testing has proven no stains or spills were evident after immediate clean up.
- In third party independent testing, Stainless scored a perfect score of 10 on the red dye 40 test.

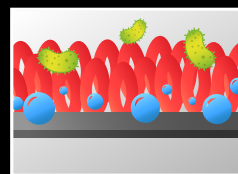

Force 5

Anti-microbial agent infused into backing to inhibit growth of mildew and mold.
Reduce the negative impacts of daily dirt and spills.

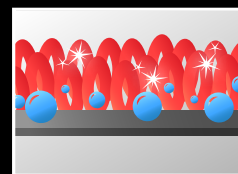

Our products are treated with Force 5, an antimicrobial agent that is applied with the adhesives of our carpet backing. This process offers protection from bacteria and mold that can affect not only the life of your carpet, but also indoor environmental air quality.

1
Force 5 is infused into the backing of the carpet.

2
Bacteria tried to attack the carpet.

3
Force 5 protects against growth of bacteria leaving carpet clean.
